

## RS3 Support Center Optomation Systems

- *Looking for specialist RS3 support or independent advice*
- *Searching for spare parts or configuration expertise*
- *Problems with your installed RS3 system*

### If you have an RS3, you should know us

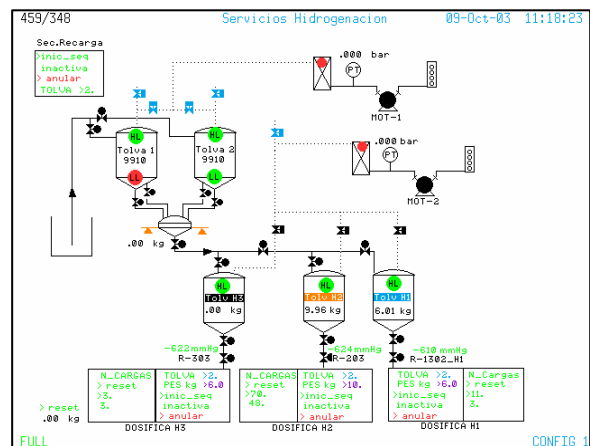

Optomation Systems was founded by a group of RS3 experts in 1996 from the Control Division of Fisher-Rosemount. Our in-depth knowledge of the system is second to none, simply because we continue to employ systems engineers who have worked with the system since its introduction in 1985.

Over the years we have grown, diversified and specialized in other technologies and leading edge products. But due to customer demand (and a little nostalgia!) we still work with the RS3, offering engineering services, training courses, complements, spare part replacements and repairs.

While Emerson Process announces their intention to abandon support, Optomation Systems reiterate our intention to continue our support for the RS3 system. Our customers are the faithful RS3 customers who cannot justify or simply do not want to change the RS3 control system running their production plants. Our customers are not only in Spain, but also worldwide.

Customers who have happily discovered that there exists a company with sufficient structure to provide comprehensive support for a system, which in its day was one of the leading systems in the control market.

We have our own engineering systems for configuration and hardware testing and a large quantity of RS3 spare parts. We also have signed agreements with other companies to extend the services we can offer, including board repairs.

**OPTOMATION**

## Services

- Consultation Services, Engineering and System Configuration
- Instrumentation and control projects and expansions
- RS3 HelpDesk and Documentation
- Hardware and Software Installation and upgrades
- Startup and commissioning services
- Preventative Maintenance and Revision
- Service engineering, board substitution and repairs
- Screen, hard-disk and keyboard replacement
- 2nd hand replacements with 1 year guarantee
- Training in English, Spanish and Portuguese
  - Operator Training
  - Maintenance Training
  - Configuration Training
  - Advanced Configuration Training
  - RBL & ABC Batch Training
- Third party communications (Remote I/O, PLC's, Ethernet TCP/IP & Intelligent Devices)
- Integration and conversion projects

## Optomation Systems

Optomation Systems is an independent software house, with nearly 20 years experience of the RS3 Distributed Control System. In addition to RS3 application software, Optomation also supports compatible products and solutions that provide independent migratory paths and life extension for the RS3 control system. This activity is not endorsed in any way by Emerson Process.
